

Pikes Peak State College Colorado Springs, Colorado Paramedic Program

Greetings!

This application is for applicants interested in applying for the Traditional or Accelerated Paramedic cohort.

Traditional:

The application process for the traditional cohort opens each January. Students are encouraged to start the process early. Classes meet on Mondays, Tuesdays, and Wednesdays from 0900 until 1600. Class will include both lecture and laboratory time. Students must also complete approximately 12 hours of clinical time per week on non-class days. This is a demanding schedule, and students should be aware of it in advance to make arrangements.

Accelerated:

PPCC EMS will accept 12 students into the accelerated program each cohort. The application process for the accelerated cohort opens in August each year. Students are encouraged to start the process early. Classes meet on Mondays, Tuesdays, and Wednesdays from 0900 to 1600 and Thursdays from 0900 to 1700. The course includes both lecture and laboratory time. Students must also complete approximately 16 hours of clinical time per week on non-class days. This is a demanding schedule, and students should be aware of it in advance to make arrangements. While an accelerated program requires a more rigorous schedule, we are excited to offer a class that accommodates students who need to complete the program more quickly.

Thank you,

Ben Roberts and Christine Sines

The following information will guide the prospective paramedic student on how to apply for admission to the Pikes Peak Community College Paramedic program.

Student Selection Criteria

Each applicant shall meet the following criteria:

1. Hold a high school diploma or general education equivalent
